Think about your online contacts!

Do you know all of them?

YES

NO

Delete them.
Only have contacts
that you know and trust online.
For more information about
how to **control friend lists**
and how to **block/delete contacts**,
see the Insafe tip sheets.
www.saferinternet.org/tipsheets

Visit
www.facebook.com/help/friends/lists
for further information
on **how to do this** on Facebook

Why are you friends with
them online if you
don't actually know them?
Would it cause a problem
if you deleted them?

NO

YES

If you really don't feel comfortable deleting them,
it may be possible to use **your privacy settings**
so you can **control and limit** what they are able to see

Is this appropriate?
Would you **share everything** with
all of the people you are in contact with
in the offline/real world?

NO

YES

So is it wise to share so much
with so many people online? Think about
whether you need to **alter your approach**.
Visit the Insafe website for further information.
www.saferinternet.org

Do all of
your friends have the
same level of access?
(i.e. can they all see all
of your content?)

YES

NO

Good!
This is a sensible approach – keep checking
your privacy settings
and make any changes where necessary.

Think about whether this is wise.
Consider the content that you are sharing
and whether it could be **misinterpreted**
or **misunderstood by others**.
Remember that it can be difficult
to understand the context of content online.
