

There has been plenty happening in Hills Phase! From festive creations and first aid to Roman pottery and woodland art, pupils have been exploring, creating and developing new skills. Here's a look at what each class has been up to.

9H1

A Creative Start to Year 9

Pupils in 9H1 have made a fantastic start to the year, settling into Year 9 life and enjoying their new lessons.

In Careers, pupils have been working hard to create their very own Christmas gnons, which will be sold at the Sutton Christmas Show. They have approached their festive designs with enthusiasm, creativity and care. We look forward to seeing the finished creations!

10H1

Learning First Aid Skills

As part of their Duke of Edinburgh (DofE) programme, pupils in 10H1 have been developing their knowledge of basic first aid and learning skills to help them respond to an emergency.

This week, the class focused on asthma, exploring what it is, how to recognise the signs of an asthma attack and how to support someone safely. Their discussions included remaining calm, helping the person use their reliever inhaler and knowing when to seek further medical help.

Pupils engaged well throughout the session, building knowledge and confidence that will support both their DofE journey and everyday life.

More from Hills Phase

Discovering the past, learning outdoors and exploring new cultures

11H1

Bringing Ancient Rome to Life

In Arts and Humanities, pupils in 11H1 have been stepping back in time to explore life in Ancient Rome.

The class investigated Roman pottery and its everyday uses, including storing and serving food and entertaining guests. Pupils then put their learning into practice, working with terracotta clay to create their own Roman-inspired pottery.

This hands-on activity brought together history, creativity and practical skills, helping pupils connect with the past through their own designs. Fantastic work, 11H1!

9H2

Creativity in the Woodland

Pupils in 9H2 have enjoyed learning outdoors in our woodland area. Mr Edney Evans taught the class how to tie a range of knots before pupils used their new skills to create woodland art to hang from the trees.

Knot-tying can be challenging, but pupils showed perseverance and determination. Working with their chosen partners, they supported one another and tackled each stage together.

It was a lovely opportunity to enjoy the outdoors, express their creativity and develop practical skills. Well done, 9H2!

10H2

Exploring France Through Art

In Arts and Humanities, pupils in 10H2 have been learning about France, discovering interesting facts about its culture, landmarks and traditions.

The class worked together to create a sensory French flag using a variety of materials and textures. This collaborative activity encouraged pupils to explore their creativity while developing their teamwork and communication skills.

Excellent work, 10H2!
